

Every screen's element layout drawn to scale on a 390px phone artboard — the overlay/trace layer. On screen these are true size; open a screen at 390px and design your art over the matching board. Companion to the full **Screen & Element Guide** (dimensions, states, theming hooks, and the art needed per element).

A template, not the design. Neutral fills so your art reads over them. Player-scaled screens are drawn at 4 players; the Course Map and game playfields fill the device below the bar.
