

Mini Golf — Screens (to scale)

Every screen's element layout drawn to scale on a 390px phone artboard — the overlay/trace layer. On screen these are true size; open a screen at 390px and design your art over the matching board. Companion to the full **Screen & Element Guide** (dimensions, states, theming hooks, and the art needed per element). 32 screens across five sections; each screen's top-right pill is the menu button that opens the global navigation drawer.

A template, not the design. Neutral fills so your art reads over them. A **dashed** card appears only when populated (a live round, a pending order, venue specials); a **solid** card is always present. Player-scaled screens are drawn at 4 players; the Course Map and game playfields fill the device below the bar.
