

MINI GOLF SCORECARD PWA

Screen & Element Style Guide

Every screen shown in the app's default (**unstyled**) look — light and dark — with each interface element numbered and spec'd. Walk it to confirm every button and interface is covered before you theme.

14 screens

Light + Dark

Numbered callouts

Per-element specs

Red circles = element callouts, keyed to the spec table on the same page.

course-tinted badge = the screen washes toward the course color (play/summary/map/rules).

How to read each page

1. The two phones are the **same screen** in the unstyled skin — dark (with numbered callouts) and light. Art must clear contrast on both grounds.
2. The **spec table** lists every element: its role, current size/shape, states, the **color hooks** it keys to, and the **art needed**.
3. Sizes, radii and the flat unstyled look are the current default — treat them as “e.g.” The **fixed** parts are the element slots, the color hooks, and the constraints (tap-target $\geq 44\text{px}$, safe areas, contrast $\geq 4.5:1$).
4. Emoji are placeholders for designed icons. Full token palette, motion catalogue, the 14 skins, and the icon-slot set are in the companion [docs/art-spec.md](#) ; validate live at [/style](#) .

1. Home /

Landing hub — pick a course, resume a round, reach maps / rules / leaderboard / install.
